

Christos Tsamis

Senior WordPress Engineer

👤 Profile

Results-oriented Web Developer with 7 years of experience specializing in high-performance, scalable WordPress architectures. As a former Tech Lead, I have a proven track record of architecting custom themes and plugins from scratch to meet complex business requirements. Expert in translating Figma/AdobeXD designs into pixel-perfect responsive interfaces and developing robust custom APIs to extend CMS functionality. Dedicated to delivering high-quality digital products that drive user engagement through technical excellence and performance optimization.

💼 Employment History

Tech Lead at IronFX, Remote

Sept 2024 — Jan 2026

- Top Tech Contributor Award (March): Recognized for leading the strategic migration of Drupal-based sites to WordPress, eliminating third-party vendor dependency.
- Top Tech Contributor Award (March): Performance Engineering: Initiated and executed the transition from Elementor to "Vanilla PHP" for high-traffic projects, significantly reducing resource usage and operational costs.
- Spearheaded the Web and Growth team for a global trading platform, managing 500+ tradable instruments across multiple brand projects.
- Architected custom WordPress Themes and Plugins from scratch to meet complex business requirements and improve platform scalability.
- Developed and integrated React-based WordPress plugins and robust APIs, bridging the gap between legacy CMS and modern frontend frameworks.
- Engineered high-performance landing pages and new feature sets, resulting in enhanced user engagement for Forex CFD traders.
- Resolved critical bugs in complex WordPress and React hybrid environments to ensure 24/7 platform stability.
- Managed technical workflows via Jira, distributing tasks based on developer expertise to optimize delivery timelines and team efficiency.
- Fostered a high-growth engineering culture by providing technical mentorship and training to team members.
